

Product Datasheet

Concept Make 12U Network Rack

Product Overview

The 12U Wall Mount Network Rack is designed for secure, organized, and space-efficient installation of networking, surveillance, telecom, and IT equipment. The rack is suitable for small offices, branch locations, CCTV systems, wireless networking, and structured cabling environments.

The rack provides robust construction, proper ventilation, cable management support, and secure equipment mounting for reliable operation of active and passive network components.
